

## RESEARCH REPORT - LABORATORY

---

PROJECT	: Rubber granulate "Uniifill 0.5 - 2.5 mm"
PURPOSE RESEARCH	: Testing the suitability and environmental compatibility of a rubber granulate for infill in football constructions
PRINCIPAL	: Unirubber Sp.z.o.o. Contact: Ms. A. Mielniczak
EXECUTION	: ISA Sport Contact: Ms. N. Siemes Project manager: Mr. E.C. van Swinderen (M.Sc.)
RESEARCH DESCRIPTION	: page 2 - 3
RESEARCH RESULTS	: page 4 - 5
APPENDIX	: I material analysis II TGA analysis

### CONCLUSION

From the results of the laboratory research it is concluded that the rubber granulate "Uniifill 0.5 -2.5 mm" meets the material characteristic requirements of infill rubber to be used for artificial turf constructions. The climatic resistance of the rubber is sufficient. The environmental research results meet the requirements from the standard DIN V 18035-7 (June 2002).
